Leading online stores provide detailed product information and they close more sales

Entering complete structured product information and running after product images to feed your eCommerce WebStore is time consuming and very expensive. Managing such a vast quantity of information is a real challenge and is costly.

Now there is a better automated way by subscribing to Dakis Managed Product Information Service, you get a complete product information database to feed your eCommerce WebStore.

By showcasing your products online with detailed information and images, you become a destination of choice for consumers and you are now considered as a destination for them to make a purchase. Consumers expect detailed product information from leading and successful online stores. To be or not to be... definitely to be! Compete today!

It's as simple as click & sell! Select the products you want to sell online, set your pricing and everything else is automated for you. Operating a leading online store doesn't get any better, easier and affordable!

Showcase all your products online with detailed information to become considered in consumers' buying decision.

If you don't showcase your products online with detailed product information you are simply not considered in consumers' purchasing decision process!

Consumers will go shopping elsewhere. Operate a leading online store today! Considering that the web is now the main source used by consumers to obtain product information and to start their purchasing decision process, it is as important to display your products online with detailed product information as it is to stock your store's shelves. In today's competitive market, if you're unable to showcase your complete product offering, to provide detailed product information and to make available the tools to assist consumers in their purchasing decision process, you simply don't exist! If consumers can't find the product they are looking for on your WebStore, they will go shopping elsewhere.

Make your WebStore useful and relevant for consumers by providing complete product information

Dakis eCommerce WebStore comes complete with a massive Integrated Product Information database that contains structured and complete product information and product images. All you will need to do is select the products you wish to sell online and set your pricing, everything else is automated for you. The Managed Product Information Database is a subscription base service. Ask Dakis for a complete list of Managed Product Information Services. It doesn't get any better and easier than this!
